PROJECTS

DENVER HELPS
REACT.JS | MATERIAL UI | TWILIO

Mile High Hacks Hackathon group project, received 1st place. Built responsive website with React.JS and Material UI, built textbot with Twilio. This project helps homeless people of Denver, they can find shelter, food, or mental/medical care from the website or text chatbot. Used machine learning on textbot to generate appropriate response according to certain keywords texted from user. **denverhelps.com** or text **"helps"** to **425-374-0096**

LOAN CALCULATOR MOBILE APP
REACT-NATIVE.JS | EXPO | ANDROID STUDIO

Mobile app built with React-Native, published to Google Play Store for Android devices. This app allows you to calculate your loan interest and includes an easy to read monthly payment chart with principal and interest amounts. **Google Play Store**
